Amirali Bagheri

Back-End PHP Developer At Karmento
Tehran, Tehran Province, Iran

Summary

As a PHP Full Stack Developer with a focus on back-end development, I have over 5 years of experience working with Laravel. I am particularly interested in DevOps and have experience working with Docker. I have also worked with React, Next.js, and Node.js Express framework. I am always eager to learn new technologies and collaborate with new people. I have experience working as a team player and am familiar with Agile methodology. My education in Software Engineering has equipped me with the skills and knowledge necessary to excel in my work.

Experience

کارمونتو | Karmento
Full Stack Developer
June 2023 - Present (9 months)
Tehran, Tehran Province, Iran

HeySite

1 year 9 months

Chief Technology Officer
June 2022 - Present (1 year 9 months)
Tehran, Iran

As the Chief Technology Officer (CTO) of a web design and online marketing company, my responsibilities include managing all aspects of the company's technology operations, with a primary focus on executing software engineering projects that meet clients' needs and requirements. To achieve this, I work closely with project leadership staff to document project requirements, create processes based on Agile methodologies, define best practices, and ensure team members follow them.

I also oversee the planning, forecasting, benefits, constraints, risks, and issues related to the program, providing support for growth and program development requirements. My goal is to deliver high-quality, scalable web applications on

time and within budget. With my expertise in Agile methodologies and project management skills, I am equipped to manage complex technology projects successfully, keeping them on track and meeting all deliverables on time.

As the CTO, I play a critical role in the success of the company, ensuring that our technology operations align with our business objectives and that our clients are satisfied with the services we provide.

Full Stack PHP Developer

June 2022 - Present (1 year 9 months)

Tehran, Tehran Province, Iran

As a Full Stack developer with expertise in PHP and Laravel, I have successfully executed several software engineering projects in my company. My notable contributions include:

HeySite CRM, a powerful website used for managing employees, projects, income, and more. I developed this website using the jQuery library in the front-end and Laravel on the back-end.

Tatabogh, a corporate website that provides legal services. I utilized React on the front-end and Laravel on the back-end to develop this website.

Kgoo Exam Builder, a website that allows users to record tests taken in various exams and receive certificates. For this project, I used the Laravel framework on the back-end and React framework on the front-end.

Through my experience and skills, I have demonstrated a proven track record of delivering high-quality and scalable web applications.

Yeki Link

Co-Founder

February 2021 - Present (3 years 1 month)

Tehran, Iran

As the founder and CEO of Yeki Link, I am proud to lead a dynamic and innovative startup that provides a comprehensive and intelligent platform for connecting and interacting services and applications with each other. Our cutting-edge technology empowers businesses and individuals to streamline their operations, increase productivity, and enhance their overall experience. With Yeki Link, users can easily integrate different software solutions, automate workflows, and achieve seamless collaboration across various

platforms. Our platform is designed to revolutionize the way we work and communicate, and I am excited to be at the forefront of this exciting journey.

SHAGO Platform

Full Stack PHP Developer

February 2020 - April 2023 (3 years 3 months)

Tehran, Iran

As a full stack developer at Shago, I was responsible for designing and implementing a highly scalable and performant ecommerce platform. I leveraged my expertise in PHP, Laravel, Livewire, VueJS, Docker, and server configurations to develop a cutting-edge product search engine that crawls multiple online shopping websites and aggregates their product information.

I worked closely with the team to design and implement a robust architecture that can handle millions of products and users. I used elastic search and Kibana to index products and continuously worked to improve the accuracy of the search engine, particularly in the Persian language.

In addition, I developed an easy-to-use interface that allows offline shoppings to register and manually price their products, ensuring that Shago's product database is always up-to-date and accurate. The platform also features a PWA app optimized for mobile devices and offering offline functionality to users.

To ensure a seamless user experience, I also implemented a secure payment gateway that enables users to quickly and easily purchase the products they need.

Overall, my experience working as a full stack developer at Shago was incredibly rewarding. I was able to leverage my skills and expertise to develop a cutting-edge ecommerce platform that helps users find the products they need at the lowest prices possible.

Targostar

Full Stack PHP Developer

January 2021 - May 2021 (5 months)

Tehran, Iran

As a full-stack programmer at Targostar, I was part of a team that recently designed a website for a client. We collaborated to ensure that we met the client's specific requirements and utilized technologies such as the Laravel

framework, HTML/CSS, JavaScript, and more to create a fast, secure, and user-friendly website.

Working at Targostar has been an enjoyable experience. The professional and dynamic work environment enabled innovation and teamwork, resulting in high-quality solutions that met our client's expectations. It was an honor to work with such a talented and dedicated team, and I am excited to contribute to future projects at Targostar.

Vandad Soft

Full Stack PHP Developer

January 2018 - January 2020 (2 years 1 month)

Tehran, Iran

As a Full Stack Developer at Vandad Soft, I have gained a wealth of experience in web development, cybersecurity, and mobile app development. Working as a freelancer, I specialized in creating WordPress sites for online stores, news, and corporate websites, as well as fixing vulnerabilities in cybersecurity. As my business grew, I decided to formalize my work under a brand, with the goal of gradually building a team of expert programmers.

During my time at Vandad Soft, I developed several mobile applications, including the SEO Professional Kit, which provides practical tools for SEO optimization on Android devices. I also created the Wire and Cable Dictionary, a mobile app that serves as a digital version of the Wire and Cable Glossary. Written by Mark Marcel and Adam Schulman, and translated by Abbas Kahalzadeh, this glossary was originally published by the Iranian Cable and Wire Association. My app features bookmarking and search capabilities, making it easy for users to navigate and access information from its extensive library of over 5,000 words. Additionally, the app can be used offline, without requiring an internet connection.

After gaining experience in the field, I transitioned to working with Laravel and continued to build my skills and knowledge in web development. As a self-employed entrepreneur, I am committed to delivering high-quality work to my clients and staying up-to-date with the latest technologies and trends in the industry. I am excited to continue my journey as a Full Stack Developer and take on new challenges in the ever-evolving world of technology.

Iranaian Auto Cable Co.

Full Stack PHP Developer

January 2017 - January 2019 (2 years 1 month)

Zanjan, Iran

As a web developer at Iranian Auto Cable Co., I was responsible for developing and maintaining the company's business portfolio website using the Laravel full stack framework. During my time there, I gained valuable experience in creating high-quality, scalable web applications, collaborating with cross-functional teams, and implementing best practices for optimal website performance and user experience. Overall, my experience at Iranian Auto Cable Co. allowed me to hone my skills as a web developer and make significant contributions to the company's online presence.

Education

Islamic Azad University

Bachelor's degree, Computer Software Engineering · (2019 - 2023)
